

## Human Resources Kiosks.

CEMEX is a global Mexican company in the construction industry. It produces and distributes cement, ready-mix concrete, aggregates, and related building materials to customers and communities in more than 50 countries.

CEMEX needed to communicate with more than 25,000 employees located in cement plants around the world. In Mexico, Cemex wanted to provide a service to their employees by giving them access to a human resources service 24/7, especially for employees that work in cement plants and do not have access to a personal computer.

## Solution

Alveni provided CEMEX with a solution that included more than 80 human resources kiosks for HR services in a simple, prompt, and effective way. Using a friendly interface and a safe application, the HR kiosks, located on-site provide continuous service to allow employees to print their pay stubs from the same kiosk. With this solution, CEMEX decreased global operations and HR administrative costs significantly.

## Results

- Reduced HR Department costs.
- 24/7 online availability to HR services in cement plants worldwide.
- Secure access to HR services for global workforce.
- Printing of paystubs and HR documents.
